**All telephone orders are despatched the same day if ordered by 2pm.**

Come and visit us at:  
 101-105 Camden High Street  
 London  
 NW1 7JN

## QUICK GUIDE TO ACUPUNCTURE NEEDLE FEATURES

**HANDLES:** **Loop** handles allow more control of rotation when hand stimulating needles. It also makes moxa stimulation of the needle easier.

**Coil** handle provides extra grip when inserting and hand stimulating needles.

**Straight** handles are easier for guide tube or plunger insertion.

**Stainless steel** handles provide a conductive element for electro-stimulation.

**Copper** provides extra conductivity and **gold** the most conductivity. **Plastic** handles are more affordable and coloured for high visibility.

**NEEDLE:** All needles are made from high tensile strength stainless steel. **Gold** plated needles provide extra 'de qi' stimulation.

**Guide tube** allows for ease and accuracy of insertion. Inserting needles without guide tubes requires more skill but allows the practitioner to have extra sensitivity and feeling during insertion.

**POINTING:** **Pine** shape (Chinese style) pointing provides extra surface area for stimulation. **Sharp** (Japanese style) pointing minimises pain upon insertion.

**Point protectors** are an added feature to ensure that the needle points are in perfect condition.
