

Welcome to

The UK's first and only Revitalised Water Centre.

99-105 Camden High Street, London NW1 7JN

WATER IS THE FUNDAMENTAL REQUIREMENT FOR LIFE.

YOU USE IT EVERY DAY.

YOU ARE 60% WATER.

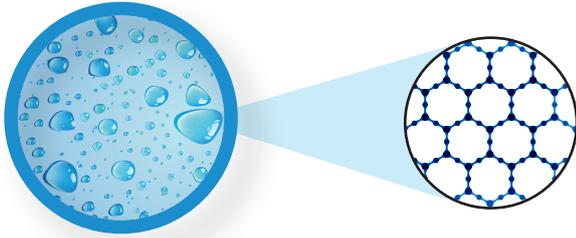

ISN'T IT TIME THAT YOU GAVE YOURSELF THE BEST
WATER POSSIBLE?

GRANDER
Revitalised Water

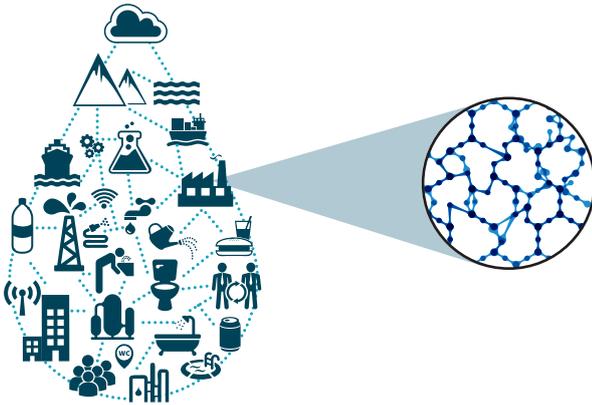

THE THEORY BEHIND GRANDER WATER

Water is not just H₂O, it has structure from water clusters.

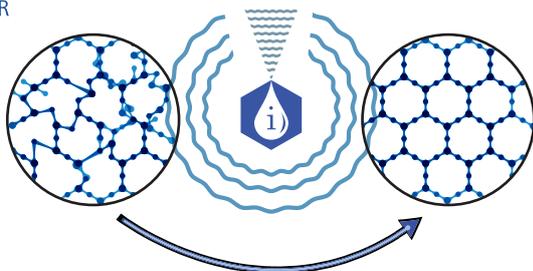

The structure is affected by every chemical or process that the water has encountered. No matter how much you filter water it will always keep this structure and add to it. This is called the **'memory of water'**.

Scientific studies [1] have shown that if you dissolve any substance into water, the structure of the water clusters change to a pattern specifically related to that substance. If you then dilute the water millions of times until there are no more molecules of the substance left, the water retains that structure and emits a fingerprint frequency related to that substance. In other words, water is able to remember everything that it has encountered. This memory becomes more complex the longer the water is in a liquid state.

The water that comes out of our taps (even bottled water) carries with it a long memory of its journey. It's structure has become tangled and incoherent. It has become damaged and has lost its innate vital integrity no matter how much it is filtered.

Our tap water has been pumped through pipes, treated with chemical processes, and has most probably already passed through other human bodies. Some say that it is affected by electromagnetic pollution [2]. Even some bottled water undergoes industrial processes that affect its structure. Can you imagine the memory of the water that you use to wash, cook and drink?

Grander Information Water clears the memory of water by restructuring it back to its virgin and coherent state. It returns water to its fullest potential for nourishing life. Think of it as a way of defragmenting and reformatting a hard drive. The result is a water like no other.

Johann Grander invented a system of treating pure glacial water from the Tyrolean mountains to create 'information water'. This water acts as a powerfully tuned antenna, receiving specific frequencies and emitting them to all water in its proximity in order to restructure it. He was awarded the Austrian 'Honorary cross for science and art' for his discovery.

WHAT DIFFERENCE DOES IT MAKE?

Improved Texture and Taste

Revitalised water has a reduced surface tension giving softer and lubricating mouthfeel without the roughness of unstructured water. This enhances the level of flavour of liquids and foods.

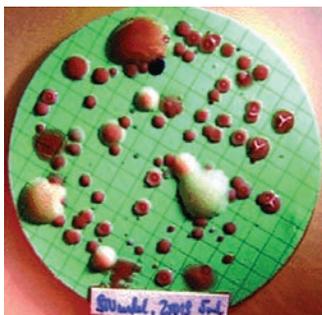

Enhanced Self-Cleaning Properties

Revitalised water regains aerobic micro-biological properties therefore restoring the water's immunity and ability to cleanse itself. Grander units are so powerful that they are used to treat effluent water and polluted lakes without the use of chemicals. [3]

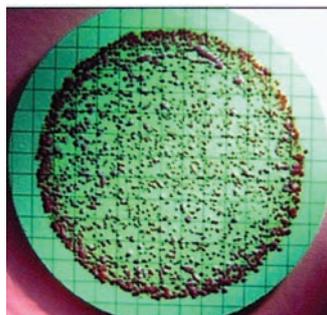

Increased Microbial Resistance

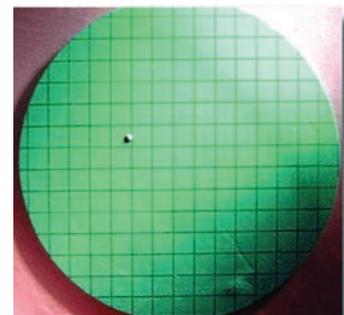

Revitalised water has been proven [4] to have a much higher resistance to microbes. This is why it is used by food companies to increase shelf life of products.

non-revitalised water

partial revitalised water

fully revitalised water

DOES IT WORK OR IS IT NONSENSE?

We asked the same question. The method for creating Information Water is proprietary so we cannot explain exactly how it works but we conducted rounds and rounds of double blind tastings and we were amazed - **we found that any liquid that was left in the proximity of the Grander units produced a smoother, more lubricating drink.** We tested it with water, tea, juice, and even with fruit (try it with grapes!). The results were always the same - you could feel a textural difference and taste an enhanced flavour.

HOW DO I REVITALISE MY WATER?

In order to revitalise any liquid, all that you have to do is place it in the proximity of a Grander product. The liquid will receive the frequencies emitted by the Information Water and begin restructuring it. The longer that it is left next to the Grander device the more complete the restructuring.

Grander provides Energy Information Boards for your kitchen or desk and Energy Information Pens for revitalisation on-the-go (we take a pen everywhere). They provide plumbed in units to turn your entire home or office water supply into revitalised water.

WHAT ABOUT THAT BLUE WATER?

Grander Blue Water is the ultimate in pure Alpine water from the Austrian mountains which has been intensely revitalised for over 6 months. This peerless water remains stable and fresh for years.

It is designed as a restructuring cordial. Just take a cap of Grander Blue Water and mix it into any liquid to revitalise it. Equally it can also be quaffed neat as a high energy pick me up. This can often help to re-trigger our natural thirst reflex.

Grander Blue Water is so highly structured that it will have the effect of revitalising any liquids in its proximity but not at the speed, strength or permanence of Grander Information Water. Some people use an atomiser to spray it directly onto the face.

To order any Grander Water accessories or home/office system, please visit shop.acumedic.com or call 020 7388 6704.

WHERE'S THE PROOF?

There are several scientific studies that show the ability of revitalised water to self purify and resist microbes. [4] The most powerful evidence comes from industries around the world that have adopted Grander Water. [5]

 Swimming pools verify that they need to use 50% less chlorine.

 Food companies confirm that their products have longer shelf life and better texture & flavour.

 Multi-national companies like Daimler Mercedes Benz use Grander in their coolant system to reduce chemicals. [6]

 Vienna airport and hotels in China and Thailand have installed Grander in their entire air conditioning system to reduce airborne bacteria.

The list goes on and is very impressive. These companies do not invest in a system on a philosophical whim, they use it because it works.

DOES IT ONLY AFFECT DRINKING WATER?

Grander affects everything which contains water. Try it with your favourite glass of whisky or wine. Use Grander to improve the flavour of your fruits or use revitalised water in your cooking. Revitalise your honey or cup of tea.

WHAT ABOUT USING IT ON SKIN?

There are testimonial reports of dermatologists using revitalized water to treat eczema and other skin conditions. People who wash with revitalised water feel a clear improvement in the softness of their skin and hair becomes softer and more manageable.

ANY OTHER USES?

Studies have shown that growing fruits and vegetables with revitalised water improves yield, flavour and texture. ^[8] There are bakeries in Germany that swear by revitalised water for higher quality bread. ^[9] There are laundry companies that find that they have to use less detergents to clean their clothes with Grander water. There are basically limitless applications for this incredible water. ^[10]

IS IT GOOD FOR MY HEALTH?

Grander or AcuMedic cannot make any health claims about revitalised water. However, we all know that drinking high quality water is a fundamental requirement for good health.

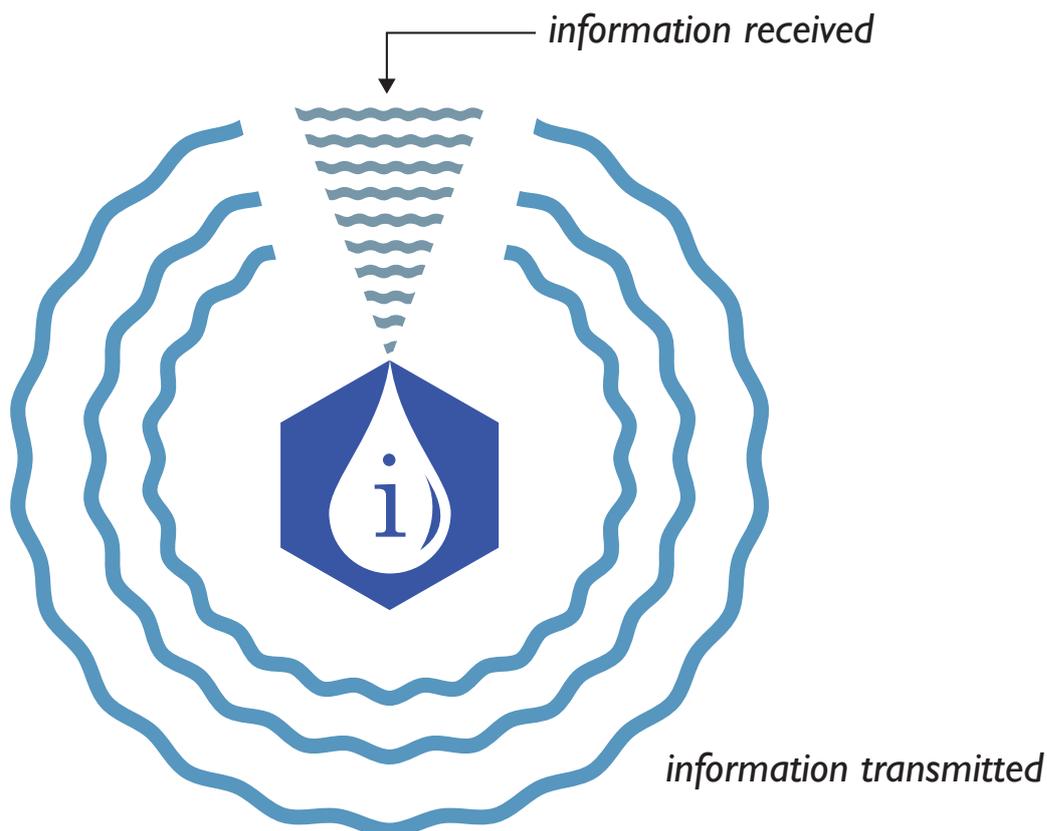

Since we are over 60% water, can you imagine the effect of drinking revitalized water and being close to Information Water? How would this affect your blood, the fluid in your joints, your brain function?

-  Studies have shown that revitalised water reduces organo-chloride compounds by up to 70% (cuts the DNA mutating effect of chlorine).^[11]
-  Industries and scientific studies have empirically proven the incredible microbial resistance found in revitalised water.^{[6] [4]}
-  Anecdotal live blood microscopy analysis have shown that regular consumption of revitalised water improved the function of white blood cells and reduced congestion, bacteria and yeast of blood plasma.
-  There is testimonial evidence of patients who use revitalised water reporting freedom from joint pain, better sleep, and improved general mood and energy.

HOW LONG DOES THE TECHNOLOGY LAST?

Forever. It may sound crazy but the Information Water will never stop working. You can pass it on to your children and grandchildren like an heirloom. Many people find this concept unbelievable but remember that Grander acts like an antenna and in the same way that your tv aerial will always work as long as there are signals in the air, Grander will never stop working. Companies who have been using the units for over 20 years have reported zero loss in the transformative ability of the Information Water. [12]

The units require no electricity or maintenance. They do not use any chemicals. If you buy the home units you can take them with you whenever you move house.

WHAT GRANDER DOES NOT DO.

Grander restructures water in order to bring it back to its full nourishing and cleansing potential. It improves the water's ability to self purify from microbes but it does not filter out any chemicals in the water. If your tap water is heavily treated then we would recommend filtering the water before revitalising.

To purchase any Grander Water accessories or home/office system, please visit our London centre or online at shop.acumedic.com or call 020 7388 6704.
